

All-In-One Marketing Solution Powered by Seamless Automation

A full-service CRE platform for streamlined lead generation, dynamic collateral creation and maximized listing exposure.

Voyager Database

Property information, lease dates and availability are pulled from Voyager in real-time into your CommercialEdge content management database.

Content Management Database

A single source of property and space information to manage data points, images, contacts, brochures, email templates and more.

Syndication

The syndication engine pushes all your property- and space-level data to your website, the CommercialEdge Listing Network and top third-party listing sites.

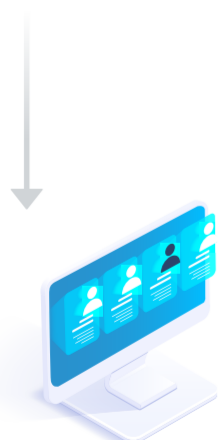

Brochures

Create brochures that change dynamically as you update listing data and images. Brochures auto-update on listing pages via syndication.

Email

Leverage branded email templates that automatically pull in property and space data. Create and send emails instantly by applying a template for one or more listings.

Lead Dashboard

All leads from your website and the CommercialEdge Listing Network flow back into the CommercialEdge Marketing dashboard.

Deal Pipeline

For CommercialEdge Deal Manager users, leads flow into the deal pipeline, creating a deal for that tenant, with contacts easily accessible in the CRM.
